CloudReplica® Joins The Open Group Open Subsurface Data Universe™ Forum

Houston, TX – (August 1st, 2020) - CloudReplica®, the leading provider of Transition and Cloud Services, is delighted to announce that it has officially joined The Open Group Open Subsurface Data Universe™.

“We are simply ecstatic about joining the OSDU Forum since it represents a natural extension of what our Virtual – Move service is all about” said Bob Reiter, Director of Business Development.

Since CloudReplica launched Virtual – Move® a little over a year ago, the new service has played a pivotal role with on-boarding the industry’s notable Super Majors most complex workloads to the Cloud. Virtual - Move dissolves traditional barriers where information is locked up in silo’s and enables a seamless transition anywhere in the world.

Bob Skiba CloudReplica’s Founder and President added “Our involvement in OSDU is very important to us and we look forward to making a positive contribution. Over the past 30 years we have witnessed knowledge being trapped in stove piped pockets stifling collaboration and innovation”.

Other important Members of OSDU include Schlumberger, which CloudReplica has collaborated through for the integration into the DELFI* cognitive E&P environment from Schlumberger.

About The Open Group

The Open Group is a global consortium that enables the achievement of business objectives through technology standards. Our diverse membership of more than 650 organizations includes customers, systems and solutions suppliers, tool vendors, integrators, academic, and consultants across multiple industries. Further information on The Open Group can be found at www.opengroup.org.

About CloudReplica

CloudReplica® offers data transition and Cloud on-boarding as-a-service. CloudReplica is celebrating 11 years focused on some of the most complex data management challenges which apply to diverse number of industry segments. CloudReplica also continues to innovate valuable solutions for Upstream Energy customers where unique data types and custom coordinate systems present challenges inhibiting most of the traditional off the shelf solutions.

More information is available on each company’s website - www.CloudReplica.com or by sending email to info@cloudreplica.com.
